Maybe even better than free.

When you use file, you avoid storing the file you're sending in your cloud storage or mail server. It is also allowed to link to the download page from websites and communities. You can give this download link to your friends by mail or instant messenger. You don't need any special software installed to be able to download your files. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. The cost of that data transfer is covered by your internet service or the data plan on your phone. Unfortunately, we can't make that part free. Simply upload your file and share the link. Our service is completely free for everyone. File is free to use with no gotchas and no hidden fees. You can upload any type of file (movies, music, documents, images, zip files and more). Any file in any format can be uploaded and downloaded for free. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. No account or credit card is required to get started. Alternatively you can choose to share your download links on blogs, forums and social networking sites. There are no restrictions on the number of times a file can be downloaded. If only we could, we surely would! On the other hand, using file can actually save you money. filehosting provides an easy possibility for you to send large files to your friends. We have no file size limit.
