Translate this page Relevant WASHINGMACHINE forum topics Candy EVOT11061D3 paneljeinek javitasa.A soros kabel csatlakozoinak kornyeye,mindketton,zarlatba ment Visszaadva. Sziasztok ! Ez egy három éves gép. Ennek a bontott paneljeit keresem a topikban. A helyszínről a vezérlőt, a kezelőlapot és az összekötő kábelt kifizetve a korbácból hoztam el. Kipattintva a kezelőt az előlappal, zárlat nyomai látszóttak. Az új kezelőlap megvásárolható. Az új vezérlőt is meg lehet venni. A kormot, koszt, letakarítva mérni is lehetett rajta. Üzemmod kapcsolót lepattintva, majd vissza rakva, durva zárlat az 12 Ohm , megszünt. Az ELKÖt vissza forrasztottam.

Kabel vissza dugva. R89 és R90. Mivel már volt nálam ilyen Candy modul az archív fotókat átneveztem. A rossz panelben lévő maradék tokozáson sem lehet semmit kisilabizálni. A fotózást ma megismertem a rossz panelekkel. Tegnap este a műfényben nem jól sikerültek a képek. Ehhez, a két panel, javításhoz kérem a segítségeteket. Amit előre is nagyon szépen köszönök. CANDY CDS 350 Sziasztok! Keresem a következő alkatrészt. Vezérlő elektronika CANDY CDS 350 típusú mosógatógéphez. Ha tudja valaki, hol lehet kapni, legyen szíves, írjon. Köszönöm. Udv. Gyuri! Ismét a hűtőgépek felé tévedtem. Van ez a nem túl régi, jelenleg is forgalmazott szerkezet, ami egy kobor villam által, pár tarsával egyetemben laptop, kázanán, stb. kimúlt. Igazából a belső lámpán kívül semmi életjel. A hőfokszabályzás sima kapillár csöves szerkezet, még mellette egy panel SMD csúccokkal. A motor R600 gázzal HKK12AA kompresszor 5 Mf kondival. Most nem mértem, ellenőriztem. Elvileg magát a motort egy próba erejéig majd direkt kiprobálok. A hőfokszabályzó tekeréskor csak a végen kikapcsolja a világítást, most nem észlelni. Egyénielőre, a műhelyszágnak át kell jarnia, még infókat szeretnék gyűjteni a csutortoki mutetje előtt. Szóval van-e esélye még feltámasztani? Még hat a gazdaságosság is, de a gép száz rugó felül volt nem is regén. Ha valakinek van tapasztalata, vagy már javította ezt a fajtát. Egyáltalán, csak az elektronika lehet a halott, vagy a mocik se csipik a tulfeszt, mert akkor kompresszor csere és az elektronika csere, javítása már necces. A fent említett mosógép megbolondult, egyket vezérlőszávkadás javítása és kondenzátor csere után, mennek a programok. Viszont egy hiba maradt nem fut csak a legrovidebb 32 perces programon. Agybajos maradt Merre keressétek? Feri Similar manuals You can write in English language into the forum not only in Hungarian.

Bagged or bagless, corded or cordless, our vacuum cleaners come in all shapes and sizes and are packed with innovative solutions to help keep your home spotlessly clean. Cookies enable us to provide the best experience possible and help us understand how customers use our website. Our website won't work without them. Update your cookie preferences. We complete most domestic appliance repairs on the first visit because we carry a wide range of parts on our vans. Hoover also offers care policies to cover your appliance against costs from accidental damage and breakdown outside the manufacturer's guarantee. We cover most appliance types and all our Care policies include accidental damage, unlimited call outs with no surprise repair costs and if it cannot be fixed we will provide a replacement, where you just pay the cost of installation. If the fault reoccurs during this time, we will come out and repair it again at no extra charge. You can change your preferences at any time. Without these cookies services you have asked for cannot be provided. And they let us try out different ideas.

We are confident it will loyally assist you in safely washing your clothes, even delicates, day after day. Carefully read this manual for correct and safe appliance use and for helpful tips on efficient maintenance. Only use the washing machine after carefully reading these instructions. We recommend you always keep this manual on hand and in good condition for any future owners. Please check that the appliance is delivered with this instruction manual, warranty certificate, service centre address and energy efficiency label. Also check that plugs, drain hose support hook and liquid detergent or bleach tray only on some models are included. We recommend you keep all these components. On receipt of your appliance please check it carefully for damage. Any damage found must be reported to the delivery driver immediately. Alternatively damage found must be reported to the retailer within 2 days of receipt. Each product is identified by a unique 16 character code, also called the "serial number", printed on the sticker. This can be found inside the door opening. This code is a unique code for your product that you will need to register the product warranty, or if you need to contact the Customer Service Centre. WEEE contains both polluting substances which can cause negative consequences for the environment and basic components which can be reused. It is important to have WEEE subjected to specific treatments, in order to remove and dispose properly all pollutants, and recover and recycle all materials. Individuals can

play an important role in ensuring that WEEE does not become an environmental issue; it is essential to follow some basic rules. WEEE should not be treated as household waste. WEEE should be handed over to the relevant collection point. This can usually be found either on or behind the door frame, or behind the removable kickplate panel at the bottom of the machine.

Our Candy Washing Machine parts range is available for delivery worldwide and for UK customers there is the option of next day delivery on all in stock Candy Washing Machine spare parts. Buy today and save money with a doityourself Candy Washing Machine repair. Cap SES E14 15 watts 240 volts 2700K Colour Clear Shape Pygmy 80 Lumens Beam. It will ensure that your Washing Machine continues to wash at its optimal. The drum paddle or drum lifter in your washing machine is a triangular prism. This Drain Pump Filter has been designed. Prices subject to change. Errors and omissions To find out what cookies we use and why we use them, click here. If you are happy to continue, click here. For these purposes we created a catalog system, where all documents, that we have, are sorted by device name. The Candy Washer manuals are sorted by popularity among Guidessimo users by the number of downloads and views on our website. We complete most domestic appliance This means that if for some reason you are not happy Our engineers are experienced If the fault reoccurs during this time, we will come out and repair it again Cookies enable us to provide the best experience possible Our site wont work without them. By continuing to use our website you accept our. By trying to restrict repairs on their machine to their own repairers, some manufacturers are effectively freezing out the competition. Unlike car manufacturers who have to share technical information with independent garages by law, electrical manufacturers are under no such obligation. This may mean that if you want your appliance repaired, you have to go through the manufacturers' own repair team, something that could be much more expensive than an independent repairer. So, posing as independent repairers, we called the top twelve global appliance manufacturers and asked them for fault codes, technical information and safety bulletins to see who would be willing to share this.

Candy Hoover and Whirlpool would give us some information but at a fee. The other nine companies refused to give us the full information or were unable to help with our inquiry. Most of these manufacturers told us that they might be able to help if we phoned up with a specific problem so we asked Graham Dixon to phone up again, posing as a repairman who has just finished repairing a washing machine with a specific fault. Would they be any more helpful Miele told him that they could only give information to their "own service partners" and despite whirlpool telling us they would provide us with information for a fee, they told Graham he would need the correct equipment which only a whirlpool engineer would have. Indesit also told Graham that he would need one of their own engineers to come out. In the case of Miele that could be as much as a 129 minimum call out charge and nearly three times more than the 45 an independent repairer like Graham is likely to charge. Miele told us "Obviously it's a secret. Bosch said they couldn't give the information because of health and safety concerns and Indesit even explained that they don't give out information to independent repairers because "obviously they're going to make money off ourselves." Something they only tell you when you ask. This gives them the perfect opportunity to try and sell you one of their warranty packages. Releasing or discussing fault codes or repair instructions over the phone with unknown individuals could be considered irresponsible and render us liable in the event that an unqualified person injured themselves or others when using said information. However it is all too common for members of the public to attempt the same when conducting their own repairs and clearly this creates potential safety issues that we simply cannot condone or support. This is the case, for example, with Gas Safety Registered repairers working on Gas products.

In this instance we validate their details online at the beginning of the call and offer full advice within the limits of their qualifications. Outside of this recognised network, customers are of course at liberty to choose any of the multitude of repairers that operate freely across the country.

However, as I have outlined above, I believe that we manage this information responsibly. Bosch Home Appliances also work with a substantial network of independent appliance repairers who have been trained to repair Bosch Appliances. Increasingly, the technical nature of Bosch Home Appliances means that we need to ensure any repair carried out, is done safely and that a fault is accurately identified and repaired for the appliance to continue performing as intended. This is not solely for the safety of the repairer but also for the customer. It's imperative that appliances are fixed and maintained by qualified and knowledgeable engineers. However, if an independent repairer requests specific information such as wiring diagrams or coding information we are able to provide this at a small administration fee. We do not produce or release technical information for general consumption. However, some information is not available for reasons of health and safety linked to product liability or because certain types of repair are either not technically feasible or economically viable. Thank you for supplying further information regarding the calls, which were made to our Customer Service and Trade Parts Teams. As a result of your feedback regarding these calls we will review our procedures to ensure that enquiries are passed to appropriately trained staff who can deal with them in accordance with our policy in this area. Findings on aftermarkets and the launch of a short market study into extended warranties.

Miele has some of the most technically developed products in the market and to support this we have a service partner network of independent repairers based throughout the UK, which work alongside our own field service technicians to support our customers. Our network of independent repairers have full access to all our technical information, and all repairers are able to apply to join our network. We also ensure that they have the correct safety and electrical qualification to support us, and more importantly our customers. For example, we have electronic controls systems which require the use of a laptop and software to communicate with the products. These have to be trained and supported. This information is held within our own system which needs to be controlled and administered to give the right access, to the right products per country and is similar to a licence fee. Therefore we ask for a fee of 120.00 which is valid for one full year. For example if a circuit board should fail the untrained independent would not have the right tool to access and reprogramme the board. They would not be able to fix it and suggest replacing the board, which would be unnecessary and wasteful, costing the consumer additional expense as well as another visit. At every opportunity it is our aim is to avoid multiple interventions and to improve our customer service. We allow some independent repairers access and they can buy the information; this is in an effort to ensure the quality of the repair and that they have the correct tools to do the job properly and correctly. It is confirmed from our research that multiple service visits are a considerable irritant to the consumer and we are trying hard to eliminate this. Our objective is to have controlled access to the technical information to ensure a high quality repair, avoid multiple interventions and pursuing a first time fix.

They are equipped with the correct tools so they can access and repair the appliance in the minimum amount of time. For example one of the criteria for an independent repairer is to have an Esam tool. The untrained independent would not have this tool and would mean a second callout and therefore additional cost for the consumer. Or the other scenario is they would not be able to fix it and suggest replacing the board, which would be unnecessary and wasteful, costing the consumer additional expense and another visit. We believe that the different types and levels of technical information, ranging from parts identification to detailed wiring diagrams and service manuals, are widely available. We provide technical information through our Electrolux Trade website, as well as directly on request. Read about our approach to external linking.
