Canon Calculators, when delivered to you in a new condition in the original container, are warranted against defective materials or workmanship as follows for a period of one 1 year from the date of purchase, defective parts or Calculators returned to a Canon U.S.A. or Canon Canada Factory Service Center and proved to be defective upon inspection, will be exchanged at Canon U.S.A. or Canon Canada sole option, for new comparable rebuilt parts or calculators of the same or similar model. Warranty for replacement shall not extend the original warranty period of the defective calculator. When returning Calculators under this warranty, you must prepay the shipping charges, if any, and enclose a complete explanation of the problem. Calculators covered by this limited warranty will be repaired at Canon U.S.A. or Canon Canada sole option, and returned to you without charge by any Canon U.S.A. or Canon Canada Factory Service Center. This warranty does not cover rechargeable batteries that may be supplied with the Calculator, as to which batteries there shall be no warranty or replacement. Repairs not under warranty will be at such cost as Canon U.S.A. or Canon Canada may from time to time generally establish. <http://sibmaxi.ru/userfiles/dsg-vs-manual.xml>

This category of calculators delivers high performance for your everyday calculations, a clock and calendar for simplicity, portability and convenience — wherever you go. Currency Conversion is built right in to the P23DHV3 so you can easily keep track of your money, no matter what currency it is in. If there is a discrepancy between the two inputs, that difference will be printed in red so you can easily see the error. Both DHV and DHV3 refer to the main product DHV3. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. I needed a little adding machine near my computer for various times and with the large readable keys and the large display window; I couldn't be happier. Lots of bells and whistles with this unit that I won't really use but if someone is interested in them all, you can't go wrong with this purchase. I did get a small amount of tape delivered with the unit, however I had plenty of my own but if you don't have any tape, better purchase some extra. Even as I view the unit, way back on the desk and under a covered area, I can still read the display. I wish I'd have been able to get the larger one however it wasn't in the budget at the time. The machine works perfectly. Does everything you could need it to within its capabilities. Very Happy with it and it's not very loud. I LIKE a lot the auto off feature that will turn the screen off when not in use. It turns back on when you touch a button.

So, no worries about a burned screen. The numbers are black, so they aren't lit green as in other 10keys also and the display is a VERY nice size for those of us needing cheater glasses. Have fun with this it's a nice product. The keypad and display are a good size and I expect fewer user errors in future calculations. It does have many more features than I'd use, but my I like it's size and ease of use. It works beautifully. The keys are easy on the fingers. Lots of options in case I need them. It has the most used functionality, and keyboard is well laid out. The calculator presents 12 characters and does the job., period. Where its small footprint is a definite need for me, this really comes through for me, especially the cost, sell, margin functionality. It's capable of so much more of course and it's nice to have a paper record when needed. Im happy! Would buy again. Answer Cannon does. BUYER

BEWARE There is no way to clear the roller when theres a paper jam. I spent 20 minutes on the phone with a Cannon customer representative, and neither of us was able to figure out a way to clear the jam. After 6 months of use, I will toss this product in the trash and purchase another one, probably from a different manufacturer. Wouldnt add etc with tape, only nontape. Shortly thereafter, that stopped working as well. Not anything! Dont waste your time. Page 1 of 1 Start over Page 1 of 1 In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Big characters on display great for my 87 year old mother. The diamond sign for note entry or subtotal is great feature. Once you are used to this it is handy but a bit confusing at first. Not obvious if you dont know it and dont read the directions. Great device. Came quickly and had AC adapter, with ribbon and a little roll of tape for printing on. I love it. This calculator got extremely light use by one person, me. The only button that responds when pressed is the FEED button. All other buttons are completely unresponsive. My original review So far so good with this product. The only thing I dont care for is the auto shut off after approx 5 minutes. Ive been meaning to look at the manual to see if theres a way to deactivate that feature but havent had the time to look into it yet. Please try again later. Buttons feel very nice to press. Big characters on display great for my 87 year old mother. The diamond sign for note entry or subtotal is great feature. Once you are used to this it is handy but a bit confusing at first. Not obvious if you dont know it and dont read the directions. Great device. Came quickly and had AC adapter, with ribbon and a little roll of tape for printing on. I love it. Please try again later. Please try again later. DonSpansk 5.0 out of 5 stars We used it at least 3 4 times each week for such tasks as balancing our checking account against that posted electronically by the bank. The new printer calculator is very similar to the original but there are some minor changes. The printer provides very legible characters and generic replacement ink rollers can be purchased from Amazon at a reasonable price. Please try again later. Please try again later. S. Giles, Shopper Extraordinaire 5.0 out of 5 stars Not a Calculator. Lots of functions for the general accounting that I, as a PTO Treasurer, am tasked with accomplishing. It can run on battery or electricity and the cord is decently long.

## System Map

176

It can also give you a total of items added up when you total the amount, which is helpful when handling 100s of checks during fundraising events for example you have 72 checks on a tape, and it will print a 72 out to the left of the total amount. Those sound like very simple needs, and they are, but those functions save me TONS of time when I have to run two tapes on each deposit. Prints very well, also. Please try again later. Please try again later. LO 1.0 out of 5 stars The only button that responds when pressed is the FEED button. All other buttons are completely unresponsive. My original review So far so good with this product. The only thing I dont care for is the auto shut off after approx 5 minutes. Ive been meaning to look at the manual to see if theres a way to deactivate that feature but havent had the time to look into it yet. Please try again later. Please try again later. noname 4.0 out of 5 stars I gave this 4 stars because the instruction are insufficient and to early to rate reliability. The instructions are cryptic but Cannon customer service quickly responded to my email. I had a problem setting the date. Below is the information I received from Cannon customer service. Thank you for contacting Canon product support. I understand you want to set the date on the P23DHV calculator. I will be glad to provide assistance. Below are the steps to assist you in setting the Date and Time on your calculator. Position the calculator so that you can look directly over the keypad to see the notations. The default date will appear. 2. Hold the TIME SET key down for 3 seconds or until you see the first digit begin to blink in the display. 3. Input the correct date. 4. Firmly press and release the TIME SET key. The first digit should stop blinking and the date is then set. The default time will appear. 2. Hold the TIME SET key down for 3 seconds or until you see the first digit begin to blink in the display. NOTE The seconds will disappear. 3.

<http://heidelberg-schloss.com/images/bushnell-weather-fx-7-manual.pdf>

Input the correct time. The first digit should stop blinking and the time is then set. The seconds will again be displayed. Follow by pressing the CLEAR key to return to the calculator mode. Please try again later. Please try again later. Robin M 1.0 out of 5 stars I have had this same model of calculator for probably 15 yrs, never a problem. Recently the printout is impossible to read even after changing the ink. I assume it is wearing out, I have certainly gotten my moneys worth. Why the one star I received the 1st replacement and immediately it was printing weird, putting in numbers that I didnt. The digital display was correct but the tape was crazy. Symbols, numbers, division sign when it was an add, etc. Then the E error displayed and it wouldnt reset or do anything. Oh well probably faulty. Received it just fine. Took it for a test and again display was odd and after 30 seconds. So I have 2 to return. Im sure it is a bad batch because my original was tried and true for years. I think I will wait to reorder or go with a different model. If you order hope you have better luck! Please try again later. Please try again later. Clifford Carroll 5.0 out of 5 stars I purchased this calculator because I had a Casio that I bought in a retail outlet that required me to enter the decimal for every entry involving money. Worthless! THIS calculator adds money values and automatically enters the decimal in the right place, AND, it cost less than the Casio. The key spacing is good for quick entry, the printer is not too noisy, and it has features that exceed my requirements. You cant go wrong. Please try again later. Please try again later. Eagle80 5.0 out of 5 stars The case is bulged out at the sides and front, and the effect is more Rubenesque than streamlined compared to the slabsided III. Like most electronics these days, its made in China. But, I have no complaints about the adding machine itself.

The materials and construction quality seem about as good as my older machine which also was made in China, and died after a long life of moderate service. The 5 key has a fairly subtle raised circle my fingers have a hard time picking it up, but then, I dont spend a lot of time with it. And, this machine does time calculations punch in start and end times, and itll tell you the difference in hours and minutes. Its an adding machine, with some calculator functions, thereby confusing users of both devices. Please try again later. Please try again later. Dale Kidd 1.0 out of 5 stars Ive bought this model from other vendors before, and have not had any problems. According to the Canon web site, there is a one year warranty so Ill be asking to have these replaced under warranty. Please try again later. Please try again later. Karl L. 1.0 out of 5 stars It started popping up with error messages and

not printing when adding more than 2 numbers. So i ordered another one, as i had spare ink rollers for it. The new one couldnt even add 2 numbers correctly. It would spit out a different number every time. And the number it printed was different than the screen was showing. It reminded me of a toy calculator. Make up your own mind. I liked my older one, but the new one was a dud. I ended up purchasing a Canon CP1200DII from amazon and absolutely love it. Which is some thing that I never thought I would be saying about a calculator. Please try again later. Please try again later. Canon P23DH Instructions; Canon P23DH Instructions. March 31, 2015. The Canon P23DHSV is a portable calculator manufactured by Canon U.S.A. The calculator has an extralarge crystal display, two color ink rollers, tax calculation function, time and calendar display and an automatic poweroff function. If your calculator is not working correctly you may try a few steps to remedy the problem. This occurs when too many numbers have been entered, when you try to divide by 0 or when data is being input faster than the calculator can process. Use a ballpoint pen to press the reset button on the back of the calculator if the display malfunctions. This will completely reset the machine and will erase any settings. Replace the paper by lifting the paper arm. Place a new paper roll onto the arm. Cut the paper at an angle. Feed the paper into the slot on the back of the machine. Turn the machine on and press the "Feed" button. Remove the printer cover to replace the ink rollers. Remove the roller by pulling up on the "Pull Up" tab of the roller. Place a new roller in place and replace the printer cover. Replace the batteries if the "Low Bat" message is displayed on the screen or if the paper is advancing at random intervals. Remove the battery cover at the bottom of the machine and insert batteries according to the signs indicated in the battery compartment. Replace the battery cover. Resources Canon U.S.A. P23DH V About the Author Based in Lakeland, FL., Heather Montgomery has been writing a popular celebrity parenting blog and several parenting and relationship articles since 2011. Her work also appears on eHow and Everyday Family and she focuses her writing on topics about parenting, crafts, education and family relationships.
